

Asymmetrical adjustable disc-type unit, System BECKER

Asymmetrical adjustable disc-type unit, System BECKER

By taking over the asymmetric adjustable disc technology from the company Becker Antriebe, Sinn, BERGES has significantly expanded its field of competence.

BERGES is the only supplier worldwide to offer the two existing variations in design: both the symmetric and as well the asymmetric disc-type technology.

The Programme: The BECKER System asymmetrical adjustable disc-type technology

- Double pulley drives	RF, RFN	for wide v-belts	up to 45 kW
- Double pulley drives	RK, RKN	for wide v-belts	up to 200 kW
- Single pulley drives	FG, GF	for wide v-belts	up to 45 kW
- Drives discs with narrow v-belt pulley in flange design	F, FN, K, KN, N	for wide v-belts	up to 200 kW

Let us know the job at issue and we will be happy to work out an individual solution for you!
