## Robust construction

- > economic
- > easy to manage system
- > low-maintenance technology
- > approved in agriculture applications

## Variable speed pulley technology.

**A better alternative also for your machine or application?**

## Belt variators for agricultural machines and equipment.

Everything under control ...  **BERGES**

## More security and efficiency for agricultural machines and equipment.

### Main- and auxiliary drives for i.e.:

- > combine harvesters
- > shredding machines
- > drying technology
- > spreading technology
- > sorting systems
- > loading wagons/conveyor technology
- > and others

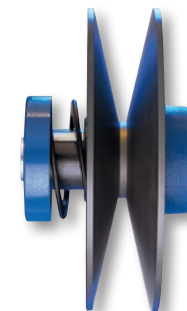

### We offer several proposals for your application!

In addition to our variators with spring loaded pressure, our product range includes also torque-dependent cam control pulleys.

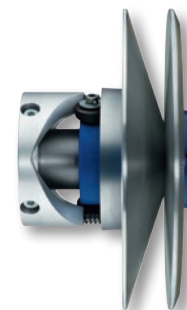

## Two systems for all constructional requirements.

**Symmetrical variable speed pulley technology up to 160 kW**

V-shaped and symmetrical cross-section

**Asymmetrical variable speed pulley technology up to 200 kW**

Asymmetrical cross-section
